Money to Loan.

Local and General

W. Tims has made a trade with his car, and is now the proud possessor of a new Ford.

Dave Cuming has again donned the butcher's uniform and is wielding the hatchet and knife instead of the rifle and bayonet.

George Glover and family left town on Tuesday for a motor trip as far as Golden, B.C.

The local school opened on Tuesday last, Miss Ontkes enrolled quite a number of new beginners. Upwards of 100 pupils were enrolled on the register this week.

Quite a lot of powder and shot was spent in the air on Monday last in search of the feathered tribe, a large number of our local sportsmen were off before daybreak to send a salutation after the ducks. Some pretty fair bags are reported.

CHURCH OF THE ASCENSION.
12th Sunday after Trinity,
Sept. 7th, 1919.

10 a.m. Sunday School.
11 a.m. Morning Prayer and Sermon.

The Rev. J. P. Dingle will officiate.

The annual picnic in connection with the Anglican Church and Sunday School on Saturday afternoon last. There were races for the children for prizes, and ice cream, etc. Tea was partaken of by all present, and a pleasant afternoon was spent. Thanks are extended to Mr. Dingle and the ladies of the Women's Guild and all others who assisted in making last Saturday's picnic the best in the history of the Church.

UNION CHURCH, CROSSFIELD
Rev. R. K. Swenerton, B.A., B.D., Pastor.

Mr. A. Knox, Sunday School Superintendent.
Sunday School & Bible Class 2 p.m.
Preaching Service at 7.30 p.m.

"The Voice of the church in the Present Social Crisis," will be the subject of the sermon next Sunday night by the Pastor. Bible study and Life Service meeting every Tuesday night at 8 o'clock. A cordial welcome is extended to all.

Notice.—On and after the 1st of August it is our intention to carry on our business in a strictly Cash basis. Our customers will oblige by bearing this in mind.

Tims and Cuming.

Miss May Whitfield although not so fortunate as to secure a premier prize in the Albertan contest won one of the lesser prizes, to the extent of \$20 worth of cut glass.

Mr. R. V. Leitch returned to town on Wednesday evening, resuming the management of the local Imperial Bank.

Farmers and others will kindly note that F. Field of Calgary has taken charge of the Calgary Realty Company's local office, and will be pleased to receive listings from any parties wishing to dispose of their farm lands.

Gudmund Johnson has taken up a farm and has been busy the past week purchasing the needful outfit.

This Year?**

I am in receipt of letters received from the principal stock raising states of America, they say they quarantine all their cattle known to be diseased, but do not stop shipping from any particular station, and hold quarantined cattle until they are properly dipped. There are millions lost to Canada by the branding system, causing the hides to class No. 3 work. South America brands on the neck and head and get No 1 for their hides. There is great loss in raising horned cattle owing to the abuse they give one another on farms and in transit.

Canada has one grain commission, and the only car of G.W. oats I have been able to raise while here was taken from me in absolute indifference to Rule 164 of the Grain Act, but the multifarious smile to beguile did not stop me from taking it before the Grain Commission, and the Chairman said I ought to have settled with the man that stole the oats. When settling with the philanthropist who made the \$40,000 in the grain business in a year, he said "I had none of the melt of human kindness in me," and before he got the words out of his mouth a local elevator man phoned and said a farmer had a car of wheat to sell, and he said "What can you buy it for?"

Canada has one Railroad Commission, so called, at Bytown, but Colonel By spirit must have requested them to change his name and retain his fame to Ottawa owing to some of the things that go on there.

When you want something from the railroad you write to the Commission, Ottawa, they send the matter to Montreal, and Montreal sends it to Winnipeg, Winnipeg sends it to Calgary and Calgary sends it back to Winnipeg, Winnipeg sends it to Montreal and they send it back to the Commission at Ottawa and the Commission sends the mess back to the west saving everything is all right here.

The poor mountainous desert state of Idaho tried to abolish their Railroad Commission the last session of the legislature and it failed. There are twenty million Canadians in the U.S. and five million Canadians in Canada, and the most alluring pictures known to modern intellectual ingenuity is distributed from the Canadian immigration office in the States. I can run one of these offices in the States.

We have a bunch of delegates go to the U.F.A. Conventions every year and other representative place empty handed to bring back a report of some of the super-naturals. One vicesec said no man could unlace the shoelaces of one of the executives who knew nothing of the commonest rules of deliberative assemblies, such remarks are absolutely misleading to those that don't know better, and unequivocally disgusting to those that do know better.

In my agitations in the U.S. I had the laws of the principal grain raising states, Railroad Commission laws from the different states and federal departments, Australia, New Zealand, the Liverpool Corn Exchange, and any one wishing any law from anywhere, I will be glad to get it for them, in my crude and infantile struggle to make this young and promising commonwealth bloom like the rose.

When I was at the legislature two years ago last winter, in St. Paul, Minnesota, there was an old horse fathered a bill to stop grain gambling, it did not behave the legislature of Minn. to do anything to suppress the manipulations of grain backed by the sharks at Duluth, Minneapolis and Winnipeg, who have been plundering those prairies since I was a barefooted boy and supported by one of Calgary's whirlwind orators whose national philanthropy and magnanimity is supposed to circumluminat the universe.

When the member from Minneapolis, the world's largest milling centre, took a round out of the bill he immediately moved, the previous question, and it was seconded in a dozen places.

We've been promised an investigation into the meat industry, but it would lessen some of Premier Borden's dividends and others of that kind.

THOS. FITZGERALD.

At the debarkation sheds at Halifax, a one-legged soldier on crutches hobbled across to another man in the line-up and hit him a tremendous punch on the nose. An officer rushed up to the one-legged disturber and asked the meaning of the astonishing assault. With a malignant light in his eyes, the pugnacious cripple said: "I've been looking for that man for two years! That's the guy on the ration party one night that bust the rum-jar!"

**MAIL CONTRACT**

SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon, on Friday, the 26th September, 1919, for the conveyance of His Majesty's Mails, on a proposed Contract for four years, twice per week on the CROSSFIELD-RURAL ROUTE No. 1, from the Postmaster General's pleasure. MOST EVERYONE USES THEM FOR THE STOMACH

They Act Quickly, and Make You
Feel Lively as a Kid.

A crowning curative triumph in medicine is now given to the world, and all who have been sufferers from stomach ailments, indigestion and headache can be cured by a purely vegetable remedy.

Colic, belching and such are no longer necessary. They are harsh and disagreeable. Science has devised something far superior, and you can go today with 25¢ to any drugist and buy a box of Dr. Hamilton's Pills, which are considered the very quickest and safest cure for the stomach, bowels, liver and kidneys.

Hall sick men and women who scarcely know what ails them, will be given a new lease of life, with Dr. Hamilton's Pills. Depressed spirits disappear, headache is forgotten, appetite increases, blood is purified and enriched, pains at the base of the spine are cured, the nerves are toned up, ambition to work is increased, and day by day the old-time health and vigor return.

A trial only is necessary to prove how beneficial Dr. Hamilton's Pills are to all who are nervous, thin, depressed or in failing health.

(Continued.)

Dave watched. Saw the black card do down at one corner of the board; saw a bystander fumbling for a five dollar bill; saw the bill laid on the card; saw it turned up—and it was red.

"That is smooth," he said. "I'd a' sworn that was the black card." "So it was—when you saw it," his companion explained. "But you were just like the sucker that played him. You couldn't help glancing at the guy getting out his money, and it was in that instant the trick was done. He's too quick for the eye, but that's how he does it."

Dave became interested. He saw two or three others lose fivers and tens. Then his companion pinched his arm. "Watch that new guy," he whispered. "Watch him. He's wise."

A new player had approached. He stood near the table for some minutes, apparently looking on casually; then his left fist came down on one of the cards. "A hundred on this one," he said, and began drumming out a roll with his other hand.

"You ain't playin'," said the dealer. "You ain't in on this."

"Ain't I? What do you say, fellows?" turning to the crowd. "Am I in or not?"

"Sure, you're in!" they exclaimed. "Sure you're in," repeated a big fellow, lounging forward. "If this guy ain't in we clean you out, see?"

"It's on me," said the dealer, with an ugly smile. "Well, if I must pay, I pay. Turn 'er up."

It was black. The dealer paid out a hundred dollars to the new player, who quickly disappeared in the crowd.

Dave had made his decision. It was plain, his companion's tip was straight. There was just one way to beat this game, but it was simple enough when you knew how. He slipped close to the table, making great pretense of indifference, but watching the cards closely with his keen black eyes. The dealer showed his hand, made a few quick passes, and the black card flew out to the right. This was Dave's chance. He pounced on it with his left hand, while his other plunged into his pocket.

"Sixty dollars on this one," he cried, and there was the triumphant note in his voice of the man who

knows he has beaten the other at his own game.

"You ain't playin'," said the dealer. "You ain't in on this."

"That don't go," said Dave, very quietly. "You're playin' a public game here, and I choose to play with you, this once. Sixty dollars on this card."

He was fumbling his money on the table.

"You ain't playin'," repeated the dealer. "You're a butt-in. You ain't in this game at all."

"Sure he's in," said the crowd.

"Sure he's in," repeated the big fellow who had interfered before.

"It's a stranger here, but you play with him or you don't play no more in this point, see?"

"That's hittin' me twice in the same spot, an' hittin' me hard," whined the dealer. "But you got it on me. Turn 'er up."

The card was red.

Dave looked at it stupidly. It was a moment or two before he realized that his money was gone. Then, regardless of those about, he rushed through the crowd, flinging by-standers of right and left, and plunged into the night.

He walked down a street until he lost itself on the prairie; then he followed a prairie trail far into the country. The air was cold and a few drops of rain were flying in it, but he was unconscious of the weather. He was in a rage through and through. More than once his hand turned on his revolver, and he half turned on his heel to retrace his steps, but his better judgment led him on to fight it out with himself. Slop-eye was now a dream, a memory, gone-gone. Everything was gone; only his revolver and a few cents remained. He gripped the revolver again. With that he was supreme. No man in all that town of men, schooled in the ways of the West, was more than his equal while that grip lay in his palm. At the point of that muzzle he could demand his money back—and get it.

Then he laughed. Hollow and empty it sounded in the night air, but it was a laugh, and it saved his spirit. "Why, you fool!" he chuckled. "You came to town for to learn somethin', didn't you? Well, you've learnin'. Sixty dollars a throw. Education costs high, don't it? But you shouldn't kick. He didn't coax you in, an' gave you every chance to back away. You bettered in and got stung. Perhaps you've learned somethin' worth sixty dollars."

With these more philosophical thoughts he turned toward again, and as he tramped along his light-heartedness re-asserted itself. His sense of fairness made him feel that he had no grievance against the card sharper, and in his innocence of the ways of the game it never occurred to him that the friends—stranger who had showed him how to play it, and the big fellow who insisted on his being "in," and the other player who had won a hundred dollars a few minutes before, were all partners with the sharper, and probably at this moment were dividing his sixty dollars—the price of old Slop-eye—between them.

Early next morning he was awake and astir. The recollection of his light-headedness, his sudden pang through his morning spirits, but he tried to close his mind to it. "No use worryin' over that," he said, jingling the few coins that now represented his wealth. "That's over and gone. I traded sixty dollars for my first lesson. Maybe it was a bad trade, but anyway, I ain't goin' to squall."

He turned that thought over in his mind. It suddenly occurred to him that it expressed a principle which he might very well weave into his new life. "He can't just get that idea, an' live up to it," he said, "never to equal, no matter what his game, now how, I guess it's worth sixty dollars." He whistled as he finished dressing, ate his breakfast bravely, and set out in search of employment.

CHAPTER FIVE

Almost the first person he met was the stranger who had schooled him in the gambling game the night before. He greeted Dave cordially; his voice had a soft, sedate, almost feminine quality which Dave had not noticed in their whispered conversation in the pool room. There was something attractive about his personality, something which invited friendship and even confidence, and yet beneath these emotions Dave felt a sense of distrust, as though

part of his nature rebelled against the acquaintance.

"That was the rottenest luck you had last night," the stranger was saying. "I never saw the best of it. I knew you were wrong the moment you had your hand down, but I couldn't butt in then. I was hoping you'd stay and raise him next time; you might have got your money back that way."

"Oh, I don't mind the money," said Dave, cheerfully. "I don't want it back. In fact, I figure it was pretty well spent."

"Lots more where it came from, eh?" laughed the other. "You're from the ranches. I see, and I suppose the price of a steer or two doesn't worry you a hair's worth."

"From is right," Dave replied. "I'm from them, an' I'm not goin' back. As for money—well, I spent my last nickle for breakfast, so I've got to live up a job before noon."

The stranger extended his hand. "Shake," he said. "I like you. You're no squealer, anyway. My name is Conward. Yours?"

"I've told his name, and shook hands, Conward, and I got my cigar box, and the two smoked for a few moments in silence."

"What kind of a job do you want?" Conward asked at length.

"Any kind that pays a wage," said Dave. "If I don't mind it, I'll chuck it, as soon as I can afford it, be particular, but just now I've got to get a grub-stake."

"I know the fellow that runs an employment agency down here," Conward answered. "Let's go down. Perhaps I can put you in right."

Conward spoke to the manager of the employment agency, and introduced Dave.

"Nothing very choice on tap to-day," said the employment man.

"You can handle horses, I suppose?"

"I guess I can," said Dave. "Some."

"I can place you delivering coal. Thirty dollars a month, and you board with the boss."

"I'll take it," said Dave.

The boss proved to be one Thomas Metford. He owned half a dozen teams and was engaged in the cartage business, specializing on coal. He was a man of big frame, big head, and a vocabulary appropriate to the purpose to which he applied it. Among his other possessions were a wife, numerous children, and a house and barn, in which he boarded his horses, his men, and his wife, in the order of their valuation. The children were a by-product, valueless until such time as they also would be able to work.

(To be continued.)

No Real Distress in Alberta

Calgary. — Exhaustive investigations have been conducted by the provincial government into the conditions of the farmers in the drought-stricken districts in the southern end of this province, with the result that it has been shown that there is no real distress arising from crop failures, and that the government will not be required to furnish very much assistance to families. However, it will be necessary to provide feed in many cases.

"Waiter, there's a fly in this ice cream!"

"Serves him right, sir. Hope he freezes to death. He was in another gentleman's soup yesterday and I'll be downright glad to get rid of him."

CLEAR THE NOSTRILS IN FIVE MINUTES

Routes Out Catarrh, Stops
Sniffles, Prevents Sneezing

CATARRHOZONE IS A MARVEL

It just takes about five minutes for the penetrating vapor of Catarrhzone to clear out clogged nostrils. Hard crusts and accumulations are quickly removed. The soothing balsams of Catarrhzone draw out every vestige of inflammation, nose clogs stop as if by magic. Catarrh is prevented, better health is assured.

To cure colds without taking drugs may seem almost too much to be believed. Catarrhzone does it quickly and effectively. Endorsed by physicians, and in common use by the people of many nations. All dealers sell Catarrhzone. Complete case, \$1.00; small size 50c; sample size 25c. Direct from the Catarrhzone Co., Kingston, Mass.

Cuba Terrified By Voodoo Worshippers

Cannibalistic Practice Resulted in
Death of Three Children

Havana, Cuba.—With the recent sudden outbreak of cannibalistic practice by voodoo worshippers, which have resulted in the death of at least three innocent children, and a half dozen of the Voodoos, the latter by which for the first time in this country's history, fathers and mothers are living in constant fear that their little ones may be spirited away by the superstitious negroes to be offered up in sacrifice to Changó, the god of the Brujos, as they are called in the Castilian language.

The Voodoos are divided into various sects, each with its separate god. The latter include Babagueye, god of snakes; Eleueu, god of injury; Olorun, god of misery, and Changó, the terrible god, to whom human sacrifices are made.

Changó, according to the Voodoo belief, was the son of Olorun and Anagui. He was slain by Eleueu, the god of injury, meetings and accusations have been heard in various quarters of the difficulties encountered by officers seeking to break up their temples because of the obstacles in their way by persons of influence.

An active campaign by the authorities in Havana and other parts of the island have resulted in the capture of numerous Brujos and the seizure of many curious and weird objects used by them.

Voodooism is not practiced by the negroes alone. Many white persons also are secretly to take part in their religious meetings.

The victims of the Voodoo sects are expected to make a week's visit to the earth, depending by the Brujos observe their holy week, the Brujos are expected to make a week's visit to the earth, depending by the Brujos observe their holy week, the Brujos are expected to make a week's visit to the earth, depending by the Brujos observe their holy week.

The victims of the Voodoo sects are expected to make a week's visit to the earth, depending by the Brujos observe their holy week, the Brujos are expected to make a week's visit to the earth, depending by the Brujos observe their holy week.

Taxation System To Revive France

Everyone Must Pay According to
His Means

Paris.—France now must found the "republic of victor" Captain Andre Tardieu declared in speech on the occasion of the transfer of the ashes of Deputy Abel Ferry, who was killed in action during the war.

The tremendous French effort by which our dead have breathed will begin with a sustained effort of material reconstruction of the whole of France.

The victory equipment must be created at once; our railways must be electrified and loans for national equipment must be floated.

"Everyone must in justice pay according to his means. In order to place this fiscal system of justice on a sound basis, two principles must be kept in view — to tax the small fortunes fairly and to tax the big ones progressively. When the big ones shall pay, as they do in America, sixty and seventy per cent, then the small ones will pay more willingly, and if the money comes the rest will be simplified."

Lucky for William

It is lucky for William Hohenzollern that his trial is to take place on English soil—not at all because the English will be more sympathetic with him than another nation might be, but because there is a traditional fairness and impartiality about English justice which no other country, not even our own, has been able to surpass. The object of the French and Italian courts is to obtain a conviction; the aim of an English court is to administer justice. Our own practice is marred by too much opportunity for delay, by devices of technicality that check justice of her due.—New York Times.

Sometimes a man remains in the bachelor class because he is shy either of color or courage.

LEMONS WHITEN AND BEAUTIFY THE SKIN

Make This Beauty Lotion Cheaply for
Your Face, Neck, Arms and Hands

At the cost of a small jar of ordinary cold cream one can prepare a full quart, pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. The Care should be taken to strain the juice through a fine cloth so no lemon pulp gets into the lotion. Keep the lotion fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan, and is the ideal skin softener, whiten and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quart pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It is marvelous to smoothen rough, red hands.

Finding Ways To Avoid Peace Terms

Significance of Militarizing Police in
Germany is Great

Coblenz. — The militarization of German police allegedly contrary to the terms of the treaty of peace, has already been begun, according to information reaching authorities here.

The recently completed, and recently organized, on military lines by the Prussian government, it is said, and are now equipped with steel helmets and rifles and follow the routine of a military company. The Prussian government of the 300 state police in office in Cassel, 100 have elected to be transferred to the new organization, and the remainder have been given places in the civil service.

The ultimate size of the new militarized police organization has not been announced. Those studying the demobilization and reorganization of the German army say that the significance of militarizing police in Germany is great.

American officers have records of an announcement that the Prussian state government, quite apart from the national government, was to organize a "Schutzpolizei" or state police force throughout Prussia, which would be virtually military units in garb with full infantry equipment, but would be under control of the minister of the interior and used only for the repression of internal disorders. These troops, according to the plan, were to be quite apart and in excess of the army permitted Germany under the terms of the peace treaty.

A semi-official announcement, however, states that it is appreciated that these troops are not permitted under the terms of the peace treaty, but the hope is expressed that the allies will be "reasonable" and permit their organization. The Cassel incident, it is contended by Austrian officers, occurred long after the treaty was signed, but before the allies and the United States had military control of Germany had gun to function, shows the Prussian government is proceeding to organize a military force, trusting that the allies will not take any action against it.

London's First Telephone Line

With telephones in such common use today, it seems hard to realize that a little more than 40 years ago a number of prominent business men in London held a meeting to decide whether or not they should venture to invest some capital in the construction of telephone lines. They were of opinion that the telephone could not be of any great commercial value, but might be used as a means of transmitting the late speeches made in the House of Commons to newspapers. As a matter of fact, the first public telephone line established in London connected the House of Commons with the Times office and was used for the purpose just mentioned.

An empty head contains a lot of useless information.

Why Britain Sets Low Wheat Price

Winnipeg.—In an interview on the price of \$1.80 set by Great Britain for Canadian wheat, W. Sanford Evans, who represented the millers at recent conferences at Ottawa, said: "The situation is quite simple. This price of \$1.80, mentioned in the cable, has, unquestionably, to my mind, nothing to do with the price at which the British Government will buy wheat, but the price at which it will resell, in conformity with its policy to ensure the ninepenny loaf."

"Great Britain absorbs the difference between the purchase price and the price necessary to allow for the turning out of the four-pound loaf for ninepence. Canadian wheat, grading No. 1 northern, cannot be made into bread for ninepence a loaf. "Last year it cost Great Britain \$235,000,000, the difference between the price it had paid for wheat and the price at which it had to be sold to allow for the ninepenny loaf. It had to charge prices for wheat which were less than the purchase price."

"This \$1.80 mentioned in the cable is the resale price. The cable, in my judgment, has nothing to do with the purchase price. The British government will purchase at whatever price it can get the wheat, and then sell at a resale price of \$1.80 in England."

"It has been doing it before. It has in the past spread the difference over wheat and flour. Now the cable is all placed on the wheat. The government decided to subsidize the loaf and placed it all on the wheat, which will represent the ninepenny loaf."

Bolshevik Cut Off From Base

London.—Military authorities here point out that the occupation by General Denikin of the town of Cherkassy, on the Dnieper river, below Kiev, cuts the last remaining line of communication of the Bolsheviks with Odessa.

The evacuation of Cherkassy has not yet been confirmed, but it is regarded here as probable that the Bolsheviks have left it.

Harvesters Create Disturbances

Pillage Town, Fire Depot and Stone Passenger Trains en Route

Riviere du Loup, Que.—A trainload of young men, numbering between 400 and 900, belonging to different parts of the district, and who were leaving for the West to work on the farms during the harvest, created a serious disturbance on the train, also robbing and pillaging in this town, one shop being relieved of \$300. At St. Andre de Kamouraska they set fire to the station, which was got under control before serious damage occurred. Other offences were committed at other places along the road, among them being the stoning of passenger trains. Detectives were finally placed aboard and the train proceeded to its destination, no arrests being made.

"Away With Erzberger"

Berlin.—Under the slogan "Away with Erzberger," the National Liberals staged a noisy meeting of protest, in which the speakers subjected the Minister of Finance to a vicious verbal grilling. Erzberger's activities from the time he conducted the armistice negotiations down to the present enactment of radical measures of taxation were made the subject of attacks from the floor. "Traitor," "Scoundrel," "Camouflaged Corruptionist," and similar epithets were heard. Some of the speakers demanded that Erzberger be strung up on the nearest lamp post.

At the meeting a resolution was adopted demanding Erzberger's retirement.

Strike in Miramichi Mills

Newcastle, N.B.—Practically every mill on the Miramichi has been tied up by a strike among the workers. Men employed loading the steamers have struck for a nine-hour day and 65 cents per hour.

Increased Wages For Telegraph Operators

Reduction in Working Time and an Advance of \$10 and \$12 Are Granted By Board

Montreal.—Substantial increases in wages are accorded the operators of the C.P.R. telegraph by an award handed down by the Canadian mail war board, adjustment number one. An increase of \$10 a month is given to Morse operators, "all outside points," and \$12 a month to the percentage groups of the percentage offices. Included in the latter are Montreal, Ottawa, Winnipeg, Moose Jaw, Calgary and Vancouver.

The wages in these three percentage groups will now be \$133.25, \$129.60 and \$122, with a minimum over the entire system of \$100 a month, with the exception of city branch offices (send only) where the minimum will be \$75 a month, and also at one or two specified points.

An eight-hour day will be worked in all outside large centre offices, a reduction of one hour. The increase is to date back to June 1, and in future the clerks are to be included in the wage schedule.

In the present arrangement, however, the amount of wages of the clerks was not decided, but will be dealt with on September 16.

Austrians And Their Treaty

Are Wanting to Take it Back to Vienna

Paris.—The Austrian delegation told the supreme council that it would be necessary for them to take the complete text of the treaty to Vienna and to submit it to the assembly for approval before he delegates can sign it.

This suggestion brought expressions of surprise from members of the council, as it had been thought the Austrian delegation had full powers. The council is urging the Austrians to make some arrangements to sign the treaty without taking it to Vienna.

The signing of the treaty, as a result of this unexpected development, it was said, may be postponed until well into September.

Citizens Would Prosecute Prince

Berlin.—At a meeting of the citizens of Teltow, a suburb of Berlin, there was a discussion of the conduct of Prince Friedrich Leopold, cousin of former Emperor William, who, unlike Count Holzenzollern, remained there instead of leaving the country. It was alleged that he had engaged in illicit trading on a large scale and had hoarded large quantities of food. Local authorities recently searched his castle, confiscating great supplies of food, which were distributed among hospitals, but when they attempted to bring action against the prince they were told from authoritative quarters that he was immune, being a member of the royal family.

Serious Fires in Northern Idaho

Missoula, Mont.—The general fire situation in forestry district number one, Montana and Northern Idaho, has never in the history of the west been so serious as it is today, according to forestry officials. New fires are breaking out, old blazes are entirely out of control, and it is reported incendiaries in the woods not only have set fires in isolated spots, but have in several instances severed connections between the fire fighting crews and the outside world, with serious results.

Supply the Home Market First

Sydney, N.S.—Instructions have been issued to the refiners by the Canadian trade commission that all local demands for sugar must be looked after before this article is exported. Such was the gist of a telegram received by P. C. Kimber, secretary of the Sydney board of trade, in reply to a wire sent to the government.

Consumers to Fight Profiteers

Paris.—Citizens and housewives of the Montmartre district have formed the "Consumers' League of France" to combat the high cost of foodstuffs. It is the intention of the founders to enlarge the league into the national buyers' federation, with members throughout the country.

W. N. U. 1278

U. S. Government Brings Down Prices

Fixed Price Of Wheat

If World Market Price Realizes More, Producer to Get the Benefit

Ottawa.—Telegrams and communications received by the government, as well as comments made by brokers and others interested in the wheat trade, indicate that the government's action in fixing an initial price for wheat to be paid to the farmers by the wheat control board is still misunderstood in many quarters. It is assumed by many apparently that the initial price of \$2.16 announced by the government is a fixed price and that no matter what the price of wheat may be the farmers will not receive more than that figure. On behalf of the government it was pointed out to a representative of the Canadian Press, Limited, that in the case of the Canadian farmer, he gets what the market of the world will give him. If the price of wheat should go to \$2.30, \$2.40 or \$2.50, the farmer will get the benefit.

On the other hand, in the United States, where a price has been definitely fixed, the farmer will simply get the fixed price.

The object of the government, it was further explained, was not to limit to any price or estimate the price that the farmer should obtain but rather to make sure that he should receive the highest possible safe initial payment upon the crop. The government through the Canadian wheat board undertakes to sell the surplus crop, not at a fixed price, but at the best world price available, and to turn back to the farmer free from all speculative and profiteering charges the balance of the price received for his grain over and above the initial payment of \$2.15.

It was further pointed out that the United States price was fixed before the war was over on the assumption that the world conflict would continue. Had that not been done it is not regarded as probable that the United States would have made a fixed price, but as it is, the United States farmer gets the fixed price and no more.

Why Shoes Are High

Boston, Mass.—Equity into the high cost of shoes by the Suffolk county grand jury developed that some shoe workers have been earning \$120 a week. These instances were said to be few, but it was testified that many made \$60 a week, while the average was about \$40. Unskilled help, formerly paid at \$12 to \$15 a week, have profited most, last boys getting as much as \$30 a week. It was said that a pair of shoes sold by a manufacturer for \$5.50 was displayed in a store four hundred yards from the factory marked at \$12.

Inheritance Tax Bill Passed

Weimar, Germany.—The assembly has passed the inheritance tax bill. The members of the Right voted against the bill. They particularly opposed the paragraph inserted in connection with the tax on fortunes exceeding 150,000 marks is greatly increased, and in some cases doubled.

Greeks Ask for Protection

London.—Saloniki representatives of 35,000 Greeks in the Ardahan district of the Caucasus have telegraphed the peace conference requesting protection against Turkish soldier brigades, who, with Erzerum as a base, are holding massacres of the Greeks there, accompanied by much pillage.

Miners Talk of Five-Day Week

Sydney, N.S.—The five-day week, a demand for a 25 per cent. increase in wages and several other matters of prime importance to the coalfields, the miners and the province in general will be taken up at the big mining conference which is to meet in Sydney this week.

Italian Troops Enter Hungary

Paris.—Italian troops are on their way into Hungary, according to reports received here. No details of the movement were given.

Washington. — Attorney-General

Palmer said there was evidence that the government campaign to reduce the cost of living already was bearing fruit. A prominent vegetable packer of Maryland wrote Mr. Palmer that prices in many lines were beginning to ease off, as it became evident the department of justice meant business in announcing that criminal prosecutions against hoarders and profiteers would be instituted where the laws were violated.

The attorney-general and Judge Ames, his assistant, drew distinctions which they said the public should recognize between hoarded food and stored food. The former is held out of the market in greater quantities than required for the owners' business for the purpose of forcing up the market.

The latter is surplus, being husbanded from the harvest to the lean season.

Reports to the attorney-general from state food administrators indicated that fair price boards rapidly were being set up in many states and were proceeding to get pledges from dealers to abide by the prices promulgated for the guidance of the public.

The department of justice announced that eleven cases had been brought under the Food Control act for seizure of food in Columbus, Ga., St. Louis, Detroit, Chattanooga and Kansas City.

Employment For Returned Men

There Should Be No Such Thing as the Soldier Problem

Ottawa.—The returned soldier problem, said Gen. Currie, during an address, had been brought to his notice since his return. He thought there was no such problem and urged the business men of Canada to give the men a chance on their return. He thought that instead of the returned soldiers creating any problem there was a shortage in killing, and that the men who stayed at home getting four or five times as much money as soldiers, and then became afraid their big money might fall off during the reconstruction period.

"Before the war," he said, Canada was able to absorb 500,000 immigrants yearly; surely we can absorb 500,000 returned men who are your own brothers. Before the war they were an asset to Canada, surely they are an asset on their return. Not a returned soldier should go unemployed."

Railways and Daylight Saving

Ottawa.—The action of the United States congress in killing daylight saving over the President's veto is taken here to mean the simultaneous death of the system in Canada. Whenever the United States sets back the clocks the Canadian railways will have to do likewise. The same argument that was used in their adopting daylight saving last spring will apply to reverting to the old system at the same time as the Americans do it.

Commr. C. Sowton to Go to Sweden

Toronto.—Commissioner Charles Sowton, of the Salvation Army, who has been in charge of the Western Canada territory with headquarters at Winnipeg, has been selected by General Bramwell Booth to take charge of Salvation Army work in Sweden, according to an announcement made here by Col. John McMillan, chief secretary for the Toronto district.

Ask Intercession for Absentees

Quebec.—At a meeting of the national trades and labor council it was decided to ask His Royal Highness the Prince of Wales to intercede to obtain a general amnesty for absentees under the Military Service act.

Heilferrich May Be Prosecuted

Berlin.—The Ministry of Justice has received instructions to examine the evidence obtained against the former vice-chancellor, Dr. Karl Helfferrich, with a view to prosecuting him.

No Waste Space

This attractive six-room house has no waste space and is at the same time an economical house to build for one who does not care to spend very much money in a house and at the same time have considerable room. It is intended that there be a vestibule for the front door extending out on to the veranda; this is not shown on this plan. The two front rooms can be made into one large room, which would extend across the

whole front of the house, making the living room do for a dining room on occasion. Many families eat in the kitchen, ordinarily, so that this front room gives a chance to carry out many forms of decoration and arrangement which cannot be done in the usual living room. The upstairs has the bedrooms and bath, with ample closet room. This house has side entrance which can be changed to rear entrance if desired.

Some Of The Benefits Derived From Irrigation

Striking addresses by Robert Stockton, Superintendent of Operation and Maintenance, C.P.R. Strathmore, Don. H. Birk, Brooks, and L. Peterson, Barnwell, were features of the sessions of the Irrigation Congress held at Medicine Hat, Alberta, August 4, 5, 6.

Mr. Stockton produced figures showing the average yield per acre production of wheat for the period from 1911 to 1918 to be 21.1 bushels wheat and 31.1 bushels oats, excluding summer fallowed land, which if included would reduce these yields to 16 and 28 bushels respectively, while on well handled land under irrigation during this period, the yields of above crops are one-third greater and the average return from grass and alfalfa is estimated to be twice as great on irrigated land. He discussed the problem of production under different heads pointing out the best methods to follow, concluding with a study of the size of a farm unit which under average conditions will support a family in comfort. His experience after 40 years living in the west was that it takes time to make a highly developed farming community and still more time to bring a great irrigation district, such as we have, to full fruition. It takes time to make an out country into a country of homes and conveniences. Let us not be impatient for our progress is rapid and there is a wonderful future before Alberta.

Don H. Birk gave an excellent address on "Profitable Irrigation Crops," declaring that the district is rich in mineral plant food. The irrigator could control most of the six essential factors in crop production, soil, seed-bed, plant food, moisture, heat and light. Under two crops would give maximum results on the same amount of moisture, which fact gave the irrigator.

Sugar Beet Cultivation In Alberta Successful

Experimental Farm Experiments Have Produced Highly Satisfactory Results.

Irrigated land has been found to be particularly suitable to the cultivation of the sugar beet. It is, therefore, quite natural that much attention should be given to the growing of sugar beets in the irrigated districts of Southern Alberta. For many years the Dominion Government Experimental Farm at Lethbridge, Alberta, has been conducting tests to secure reliable data upon the possibilities of sugar beet development. The experiments have produced highly satisfactory results. It was found that the Alberta product had a greater tonnage per acre and a higher sugar content than the average in the United States. Under irrigation the Lethbridge Farm yielded as high as 17½ tons per acre. There is little doubt that the sugar beet industry is bound to succeed in Alberta within a reasonable time. Alberta has in the Western Provinces an immediate territory to serve with a demand for over 170,000,000 pounds of sugar.

Hungary and Rumania.

Vienna. — A statement attacking Great Britain and America, demanding that Hungary be united with Rumania under the sovereignty of King Ferdinand and threatening to strip Hungary if the Rumanian army is forced to withdraw from that country, has been presented to Archduke Joseph, head of the Hungarian government by the authorized Rumanian representative at Budapest, according to despatches received here.

Many New Schools Being Built. Many new schools are being built throughout Western Canada this summer. One firm of contractors is building no fewer than one hundred and thirty-five schools in the province of Saskatchewan at the present time. All kinds of schools are being built from the fully equipped city and town schools to the small frame rural school.

One seldom realizes that he is wrong until he is found out.

great advantage over other farmers. The speaker told of the production of one acre of alfalfa seed at Brooks which yielded 15 bushels of seed that sold at fifty cents per pound. Alfalfa, however, was a fickle crop for seed and could not be depended upon to show such results always. At Tilley, in 1917, three and a half acres of alfalfa seed had reached five feet in height, thrashing 12½ bushels to the acre. This spring he had sold that seed for forty cents per pound. He also produced 1,000 pounds of white clover on three acres, selling it at sixty cents per pound. He advocated rotation, "for the more we rotate the more money we make," he declared.

Fred Davis, a farmer in the Irrigation District, stated that he had never used irrigation during the winter years, he has been on his farm until this year, and as a result he will have from 25 to 30 bushels of grain as against from 4 to 5 bushels he had last year. He is an enthusiast from now for all time, stating that he may be called on at any time for assistance and collaboration.

Mr. Hays, manager, Canada Land & Irrigation Co., whose project the delegates visited on August 5th, gave figures which he based on four years' work, 1915 to 1918, by which he claims an increased yield for irrigated land over unirrigated land (based on prices paid respectively over the four years for different crops) applied to 100 acres, to a value of \$8,000.00. The increase for two wet years, 1915 and 1916, at the respective prices paid, was \$4,767.00, and similarly for the dry years, 1917 and 1918, of \$12,414.00. The increase in the average increased value per acre, for the four years at \$15.00 per acre over and above the returns from non-irrigated land.

If China Could and Would

The world would be more blessed than it is if China could and would defend herself against unjust aggression. Her population is 400,000,000—physically and mentally as strong perhaps, as the average of mankind. She can guard her own frontiers. The mere knowledge that she proposed to use her power in a just cause would settle the Chinese problem. Probably nothing else will. There is better prospect of peace through a general recognition of the duty of protecting oneself than quelling the saying of Franklin, that the worst peace is better than the best war—a maxim in which mankind did not himself believe, for he was a zealous leader in supporting two wars.

Confucius was a great man, but he did not advantage peace much by inducing his people to accept doctrines of nonresistance and neither do our long hairs and short hairs help peace when they lift their thin voices in complaints of nationalism and of patriotism, the spirit which "gives nationalism of energy." —New York Tribune.

Earliest Date Wheat Received.

Brandon. — Two loads of wheat have been received by the Western Canadian Flour Mills. They are from the farm of T. Durbin, west of the Indian Industrial school. The wheat weighs No. 2 Northern, weighs 58 pounds to the bushel. The receipt of this wheat is 15 days earlier than ever before recorded by milling men here.

Austrians Protest Against Monarchy.

Paris. — It is reported from Vienna that the entire forces of Austria are protesting against efforts to establish a monarchy. The soldiers, in a demonstration before the parliament buildings, urged that the republican form of government be retained. There were similar demonstrations in the country districts.

Some men practise what they preach, but the majority are satisfied with preaching what they practice.

Business In Western Canada

Considerable Gain Every Month Over the Corresponding Periods of 1918.

The bank clearing returns are generally relied upon as a measure to show the condition of business, and may be considered fairly accurate in this respect. Throughout the present year the figures have shown a considerable gain every month over the corresponding periods of 1918. The month of July was no exception. During this month every city in the Dominion had a greater or lesser increase. The aggregate increase of six of the leading cities in Western Canada amounted to \$63,311,400. Winnipeg had a turnover of \$163,813,469 as compared with \$44,671,102 in July last year. Vancouver's figures jumped from \$44,671,102 in July, 1918, to \$54,076,340 last month. Calgary's from \$21,071,080 to \$28,053,191; Edmonton's from \$13,206,640 to \$19,699,769; Regina's from \$12,451,728 to \$16,650,886; and Saskatoon's from \$6,757,427 to \$9,382,795. Moose Jaw, Brandon, Medicine Hat and Lethbridge each had similar increases.

Dominion Park Horror

Management Explains Why Place Was Not Closed.

Montreal. — That the entrance of Dominion Park was closed during the fatal fire on Sunday afternoon and that they were re-opened, when the flames threatened to take the place, are items in the statement made by the directors of the Dominion Park, over the signature of J. E. H. Redpath, president.

The statement goes on to say that the management would have been only too glad to close the park after the loss of life had been discovered, but that with thousands arriving and thousands already in, it was feared that such a move would have led to wild rumors ending in a panic in which there might have been heavy toll. Before the band program commenced all the bodies of the unfortunate victims had been removed from the park.

Canadian Guns Given to Mons.

Mons, Belgium. — Canadian cannon which fired the last shots at the Germans on armistice day, November 11, were presented to the village of Mons with elaborate ceremonies. Colonel Bovey, of the Canadian forces, said in presenting the guns that they would "be a souvenir of the kindness shown by the natives of the town to the soldiers of the village of Mons spoke of the self-sacrifice of the Canadians, who "without profit, came to fight for the liberty of Belgium."

Japanese Cable Proposed.

Tokio. — Prominent Japanese business men have formally decided to float a loan of 50,000,000 yen (about \$25,000,000) for the purpose of laying a cable line between the United States and Japan. This decision is the result of dissatisfaction which has existed for a long time among business men on both sides of the Pacific with the present cable service, which seems unable to handle the constantly increasing volume of business.

Mineral Production of B. C.

The total value of mineral production in British Columbia in 1918 is placed at \$41,782,474 in the annual report. The increase over 1917 was \$4,772,082. Gold places is \$3,205,000; gold lode, \$3,403,812; silver, \$350,870; lead, \$2,928,907; copper, \$15,142,444; zinc, \$2,899,040; coal, \$11,511,225; coke, \$1,322,769; miscellaneous, \$1,048,202. The production in 1918 is 45,016 ounces of gold and 416,616 ounces of silver.

Hutterite Body Held At Border.

Winnipeg. — A colony of 28 Hutterites from South Dakota on their way to Elm, Man., were stopped at the boundary by Canadian immigration authorities and are now located in the detention house at Emerson, Man.

Their legal adviser tried to secure their admission as settlers, but did not succeed. They will have to apply to Ottawa for admission now.

Many a poor fisherman gets tangled up in a string of lies.

Winter Rye In Western Canada

Expelled Jews Helped Industries

Russia Provided Poland With Human Factor of Great Importance.

An odd bit of commercial history comes to light with the granting of citizenship to Jews in Poland, and shows how Russia, in expelling the sale from Moscow, provided Poland with a human factor of great importance in developing her own industrial resources. Politically Poland lay helpless in the grip of her powerful neighbor, resisting as best she might that neighbor's determination to destroy the last vestige of Polish national existence. Industrially, on the other hand, her coal and iron ore districts had developed Polish centers of manufacture superior to those of Russia, but dependent for success on the sale of their products in Russian markets. Jews came from Moscow who were familiar with Russian trade conditions, had already established personal trade relations with Russian cities, and were admirably fitted to develop a commercial program between the two countries. These men became the natural intermediaries between Poles and Russians in business, and their expulsion from Russia is doubtless one reason for the prosperity of Polish industries at Lodz, Warsaw and Petrokow—Christian Science Monitor.

Jellicoe's Big Mission

Scope Believed To Be More Than Australian.

Vancouver, B.C. — A special despatch to the Vancouver Province, from Sydney, N.S.W., says:

"It is believed that Viscount Jellicoe's report on the naval defence of Australia will be of the frankest nature, demanding that the Commonwealth recognize fullest obligations of empire and condemning its past policy. In future Australia will take its important part in a deeply considered Imperial scheme in which the Commonwealth will be allotted the duty of preserving the interests of the empire in the southern Pacific. The China squadron will consist of a powerful fleet guarding against a possible eastern menace."

"In the best informed circles here it is the growing opinion that Jellicoe's mission is more than Australian in its scope, covering an investigation into the entire future Pacific question, including an inquiry into Japan's commercial penetration of the British dominions, and Asia, which the keenest Australian minds consider prepossessing of this sparsely-peopled continent. Figures in possession of the Commonwealth government show that Indian trade Japanwards, quadrupled during the war period, while Japan's trade India-wards increased 50 per cent. Australian public opinion is already uneasy about the increase of Japanese imports and sees fresh significance in these facts."

Hungarian Paper Suspends.

Berlin. — One of Hungary's best known newspapers, the Pester Lloyd, has passed out of existence. It was taken over by the Soviets when they took control of Budapest and was so conducted that its editor, Mr. Josef, states that he is unable to continue its publication. He announced that he would not be responsible for the articles that had appeared in it since the beginning of the Soviet regime.

Jews Want To Emigrate.

Copenhagen. — It is reported from Warsaw that 40,000 Polish Jews have asked permission to emigrate to America. It is expected that there will be great number of emigrants leaving the whole of central Europe in the near future.

Hungary Seeks Loan.

Berlin. — A group of Hungarian banks will attempt to negotiate a loan for the new government at Budapest, according to despatches received here, the government having been unable to borrow the 1,500,000 crowns sought from Austro-Hungarian banks.

Rye is a crop that has been sown in larger and larger quantities in Western Canada during the last few years. It has been found, in general, to be one of the most dependable crops that can be grown year in and year out. It yields well, too. On the Government Experimental Farm at Indian Head, Sask., the average yield of rye over a period of seven years has been forty-three and a third bushels to the acre. It intended for grain the seed is sown in the latter part of August and harvested between the middle and end of July the following year. In Western Canada it is grown mostly for pasture and is used in the same fall as it is sown and then again the following spring. After pasturing some farmers allow it to grow and produce a grain crop. Many large crops of rye have been harvested this year throughout the West, but the crop will be considerably larger next year for so far more farmers have been busy sowing, or preparing to sow, this crop than in any previous year.

Value Of Irrigated Land

Experiment On Pasturing Cattle On Irrigable and Non-Irrigable Land.

The value of irrigated land for raising cattle has been well illustrated by the experience of A. M. Steed, of Sirling, Alberta. Mr. Steed has two farms in Southern Alberta, one east, and one west of Sirling. One is irrigated and the other is not. Last year he made the experiment on the pasturing of two herds of cattle of almost equal numbers on irrigable and non-irrigable land. The results are very interesting.

On non-irrigated land eighty-six head of cattle were pastured on six hundred and forty acres. By the fall the whole of the grass on this area was eaten off sick and clean. On irrigated land ninety head of cattle were pastured. The land was fenced into two fields, so that the cattle could be changed every two weeks. At the end of the season the cattle on the irrigated land were fatter and in better all-round condition than those on the non-irrigated land, while there was more grass on the two forty acre pastures than there was on the whole other six hundred and forty acres. "In fact," said Mr. Steed, "there was enough grass left on the eighty acres to pasture sixty head of horses through the winter in condition that they came off fat in the spring."

Mr. Steed is a breeder of Short-horn cattle, and owns one of the largest herds of this breed of cattle in the province. With high-priced pasture he has found it most important to have a supply of cheaply produced feed, and he is convinced that there is nothing like irrigation to ensure this.

Mines Again Idle

Industrial Workers of Mid-Silesia Also Realize.

Berlin. — Sixty per cent. of the Upper Silesian coal fields are again idle as a result of a fresh strike, which has threatened to be more serious than any of the previous strikes there. The Communist agitators are again revealing that they are freely spending funds to induce the workers to quit. The industrial workers of mid-Silesia also are restive, owing to the unimproved food situation.

Mediterranean Port To Bulgaria.

Paris. — The supreme council, the Echele Paris says, is preparing to give Bulgaria an opening to the Mediterranean Sea through either Kavala or Dedegatch. The territory surrounding the port selected would be neutralized and placed under a status similar to Danzig.

That port of Thracian given Bulgaria at the close of the Balkan war included Dedegatch. The Bulgarians and Germans built a railroad from central Bulgaria to Dedegatch.

Buying 500,000 Tons of Wheat.

Melbourne, Australia. — The Imperial Government has intimated its intention to exercise its option on half a million tons of wheat.

WORKING AFTER SIXTY?

You surely must if you don't save when you are young. An Excelsior Endowment is the best way. Write for pamphlet to-day

THE EXCELSIOR LIFE INSURANCE CO.

Australia Bars Enemy Aliens.
Melbourne. — An amendment to the Commonwealth Immigration act has been introduced into the house of representatives, providing that no persons of former enemy parentage or nationality shall be admitted to the commonwealth for five years.

THE MAN WHO WINS

Is Always Full of Life and Energy — Faltures Are Weak and Bloodless.

Some men seem to have all the luck. If there are any good things going these men seem to get them. They make other people do their will — they are leaders. If they are business men they are successful, if they are workmen they get the foreman's job. They have the power of influencing people.

The same thing is true of women. Some have the charm that makes men seek them and others are always neglected. But this is not luck. It is due to a personal gift—vitality. Men and women of this sort are never weak, puny invalids. They may not be big, but they are full of life and energy. The whole thing is a matter of good blood, good nerves and good health. Everyone would wish to be like this and the qualities that make for vitality and energy are purely a matter of health. By building up the blood and toning up the back, stopping shoulders, headaches and the intellectual sort of weakness can all be got rid of. Dr. Williams' Pink Pills have made many weak, tired men vigorous and healthy, and many pale, dejected girls and women plump, rosy and attractive, by improving their blood and toning up their nerves. If you are weak, ailing, low-spirited or unhealthy, begin to cure yourself today by the use of Dr. Williams' Pink Pills.

You can get these Pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

It's dead easy for a woman to beat a man in an argument; all she has to do is to turn on the brainy flow.

Time Has Tested It.—Dr. Thomas' Elettiric Oil has been on the market upwards of thirty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its effects have carried its fame beyond the seas. It has no equal in the whole list of liniments. If it were double the price it would be a cheap liniment.

Will Drill For Oil

Imperial Oil Company Make Another Attempt in Alberta.

Lethbridge, Alta. — Announcement was made here by Charles E. Taylor, chief geologist for the Imperial Oil company in Alberta, that as a result of a geological survey made by 12 crews who have been working the foothills section of Alberta, all spring and summer, the company will start drilling southwest of Lethbridge as soon as a rig can be put in the ground. The site of the drilling operations already has been chosen.

The company is determined to make a final test of Alberta for oil, and their campaign plans for the drilling a series of test holes in the first anticline east of the mountain all the way from the international boundary to the McKenzie River basin.

If a fat woman could see a moving picture of herself—running to catch a street-car, she would wait for the next car.

No Protectorate

Is Contemplated Between Great Britain and That Country

London.—Nothing in the nature of a protectorate over Persia is contemplated by the agreement between Great Britain and that country, Cecil B. Harmsworth, under-secretary of state for foreign affairs, told the Commons.

"The policy of His Majesty's government," Mr. Harmsworth said, "is to assist Persia to re-establish herself on a sound basis."

"There is not the slightest foundation for a suspicion that the government proposed or that the Persian government would have considered the creation anything in the nature of a protectorate."

"The Persian government turned to Great Britain as her most powerful friendly neighbor and this government would have departed from its traditional policy of warm interest in the Persian government had it declined to respond to her appeal."

Conquers Asthma. To be relieved from the terrible suffocating due to asthma is a great thing, but to be safeguarded for the future is even greater. Not only does Dr. J. D. Kennedy's Asthma Remedy bring prompt relief, but it introduces a new era of health for the afflicted. Systematic inhaling of smoke or fumes from the remedy prevents re-attacks and often effects a permanent cure.

Germans For Argentine.

Buenos Aires. — Baron von Dembowski Haddenhausen, former German minister to Argentina, who arrived here early this month, represents a German colonization syndicate, which is buying land to accommodate Germans who are coming to Argentina, the newspaper Eldiaric says.

The newspaper asserts that the baron and his fellow agents have already bought 12,000 hectares (29,640 acres) and are actively exchanging cablegrams with Berlin.

Minard's Liniment Cures Distemper.

The Japanese Royal Family may be photographed when driving in a carriage, but not on horseback or walking. This is a great concession to democracy as when the coronation took place in 1915 photographs of the emperor and empress shown in shop windows had the faces of their majesties obscured by pieces of paper.

Minard's Liniment Cures Garget in Cows.

Ex-Kaiser Buys Estate.

Utrecht, Holland. — Former Emperor William, who has been living at Amerongen since his arrival in Holland, has purchased the estate and house of Doorn, in the village of Doorn, near Utrecht, according to the Dagblad. The estate was bought from Baroness de Beaufort. It is about five miles north of Amerongen in the direction of Utrecht.

Lace Machines for France.

London, England. — Nottingham lace operatives are taking steps to bring to the notice of parliament the proposed transfer from Nottingham to France of lace machines to replace those destroyed by the Germans. The lace operatives raise no objection to the acquisition by French manufacturers of new machinery if obtainable, but urge that the disposal of existing machinery will lead to a great deal of unemployment in Nottingham. They propose that the Germans should be made to give up their machines to France.

Bolshevik Driven From Odessa.

London.—The Bolsheviks have been driven from Odessa, the most important port in the Black Sea, by the populace of the city, according to reports received by the British war office. It is reported also that the Soviet forces are evacuating Kiev and the entire Ukraine.

W. N. U. 1278

Are Old Folks Good Spellers

Schools of Years Ago Were More Efficient Than the Schools of Today

They had an old-fashioned spelling bee at the New York Chatauque the other day, and the casualties were so heavy that the list had to be given out in instalments. Among the victims were professors and teachers, ministers, lawyers and doctors.

The younger men and women gradually dropped out, and the last ten belonged to a previous age in American education. The very last two were white-haired women, old enough to be grandmothers of some of the contestants.

Some will say this shows that the schools of years ago were more efficient than the schools of today, or at any rate taught spelling more efficiently. But it is not possible that many old people are good spellers simply because they are old. Nearly all of us improve as spellers as we grow older.

There is Only One Genuine Aspirin

Only Tablets Marked With "Bayer Cross" Are Aspirin

If You Don't See the "Bayer Cross" on the Tablets, Refuse Them—They Are Not Aspirin at All

Your druggist gladly will give you the genuine "Bayer Tablets of Aspirin" because genuine Aspirin now is made by Bayer and owned by a Canadian Company.

There is not a cent's worth of German interest in Aspirin, all rights being purchased from the U.S. Government.

During the war, acid imitations were sold as Aspirin in pill boxes and various other containers. But now you can get genuine Aspirin, plainly stamped with the safety "Bayer Cross." Aspirin proved safe by millions for Headache, Toothache, Earache, Rheumatism, Lumbago, Colds, Neuritis, and Pain generally.

Handy tin boxes of 12 tablets, also larger "Bayer" packages. "Aspirin is the trade mark, registered in Canada, of Bayer Manufacture of Monoaceticacidester of Salicylic Acid."

Will Restore Shantung to China.

Tokio. — Restitution to China by Japan of those parts of Shantung province, including Kiao Chau, now occupied by Japanese forces, will be made without unnecessary delay, but the time required will be dependent upon the attitude of China, said Ta-ka-shi Hara, Japanese premier, in answer to a question as to when actual restoration would take place.

Minard's Liniment Cures Garget in Cows.

Ex-Kaiser Buys Estate.

Utrecht, Holland. — Former Emperor William, who has been living at Amerongen since his arrival in Holland, has purchased the estate and house of Doorn, in the village of Doorn, near Utrecht, according to the Dagblad. The estate was bought from Baroness de Beaufort. It is about five miles north of Amerongen in the direction of Utrecht.

McClary's Kootenay

SURELY it is every woman's right to have a range like the Kootenay!—a range that she can depend on—a range that is a real joy to work with—a range easy to keep clean—a range that "keeps the oven hot" with a small fire. The cooking-top is burnished brighter than steel; it never needs blacklead. The oven wall of nickle-plated steel is easily cleaned. The duplex grates clean down the fire with a single swing of the lever. See this famous range.

WM. LAUT, Agent.

McClary's

District Meeting at Innisfail

Messrs. D. A. Jeffery, Robert Colling and the Rev. R. K. Swenson were delegates in attendance at the District Meeting at Innisfail last Wednesday. The Inter-Church Forward Movement was presented by Rev. Thos. Powell, Superintendent of Missions, Calgary, and Rev. Lloyd Smith, Assistant Secretary of Home Missions, Toronto. Mr. Smith said that Millarism had been transferred from the battle-field to the industrial situation, and that we are now at the beginning of a perilous industrial warfare. Blood had already been shed. Employers and laborers are in opposing camps and automatic power is sought by both parties. The Church does not count in this dangerous situation. It must arouse itself to meet the need, its people must have some progressive action for this new day. God's claim must be recognized. Too much of our so-called christianity is fictitious, and worthless. Mr. Woodworth of Japan told of the swift changes coming over that island country and of the huge educational institution at Kobe, with which he is connected. Eighteen hundred students are in attendance there, with hundreds being turned away for want of room. Japan has become a great industrial nation, and ships large quantities of goods to Canada. Kobe is the greatest port on the Pacific. Forty Japanese students are in attendance at the college preparing for the Christian ministry. But western civilization is bringing its vices as well as its blessings, and a missionary telling of christianity was interrupted by an inquirer who asked the question "How many saloons and brothels are there in Christian Chicago?"

Rev. A. S. Tuttle Preaches at the Union Church

Rev. A. S. Tuttle, Principal of Alberta College, preached a thoughtful, scholarly sermon last Sunday night at Union Church from the text, "We would see Jesus." He said physical efficiency was not enough, nor was it sufficient to satisfy aesthetic tastes. To quote Shailer Matthews "The heart that cries out for God would be starved to death with but a painting and a song." Helen Keller blind, deaf and dumb was asked by Phillips Brooks if in her darkness she knew God, she asked "Who is He?" Then the great preacher described Him as Creator, Preserver, Father of all mankind, the One who loves us and satisfies our deepest needs. When he had finished Helen Keller said, "I always knew Him, but I never knew His name." Why can Jesus supply all our needs? Because He is the most human God this world can ever see. He led a life of simple, everyday goodness. He is the one factor who alone can unite men. The disc are loaded today in favor of the clever racial rather than the faithful plodder. Some of the best devotees to Socialism are in despair. "And Spurge in his book 'Marxian Socialism and Religion' has well said 'Socialism; there he prepared to be saturated with religion; it is to win.' If you leave religion rooted in the human heart it will find expression in any system. An irreligious aristocracy gave France the miseries of the old regime. An irreligious democracy brought France a reign of terror. We are at the crossroads and the next year or two will determine the trend of events for generations to come. Brotherhood must be built upon the Fatherhood of God.
